

Summing ticket charges

Ben Henley - 2018-05-14 - Commenti (0) - DPQL Examples

If you want to get the sum of all charges on a ticket, you can do this:

```
SELECT tickets.subject, TIME_FORMAT(SEC_TO_TIME(SUM(tickets.charges.charge_time)),  
'%Hh %im') AS 'Charge Time'
```

```
FROM tickets
```

```
GROUP BY tickets.id AS 'ID'
```
