You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration page in the Deskpro Admin interface. The 'Button settings' section is expanded, showing options for Label, Size, and Colors. The 'Colors' section is highlighted with a red box, and a color picker is open, showing the selection of a blue color (#e60300). A black arrow points from the color picker to the chat widget preview on the right, which shows a Google search bar and a chat window.
