New Chat Widget colors available

2017-05-30 - Zara Marchesi - [Commenti \(0\)](#) - [Product](#)

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' section is expanded to show 'Colors'. A color picker is active, showing a red color with the hex code #e60300. Two black arrows originate from the color picker: one points to the top header of the chat widget in the preview, and the other points to the 'Click for help' button at the bottom right of the chat widget. The preview area shows a chat widget overlaid on a Google search page. The chat widget has a white background and a blue header with the Flexforce logo. The chat history shows a 'Sample question' and a 'Sample answer'. The bottom of the chat widget has a 'Type your message to Agent' input field and a blue 'Send' button. A red 'Click for help' button is located at the bottom right of the chat widget. The configuration interface also includes 'Chat settings' and 'Proactive chat settings' sections, and buttons for 'Discard changes', 'Save', and 'Reset to default'.
