New Feature: Round Robins

2014-08-11 - Ben Henley - [Commenti \(0\)](#) - [Product](#)

When you're managing a busy helpdesk, sharing out the workload evenly can be vital.

We've added support for 'round robin' assignment to DeskPRO's powerful automation system. Here's how it works: you define a queue of agents, and as tickets come in, each one is assigned to the next agent in the queue, until the end is reached and the round robin begins again with the first agent.

Because you're assigning to individual agents, it's always clear who's responsible for each ticket; and because it's automatic, there's no time spent deciding who'll handle which issue.

The screenshot shows a configuration form for a round robin queue. At the top, there is a 'Title *' field with the value 'Support triage'. Below this, a note states: 'This is the title as it will appear throughout the agent and user interfaces.' The main section is labeled 'Agents *' and contains a list of agents with checkboxes. The agents listed are: Gideon Beard (checked, with a 'Next in queue' badge), Lucy Hamlet (checked), Hisco Romnus (checked), Nadim Singh (checked), Chris Max (checked), Lesley Burrow (checked), and Sue Kalam (unchecked). Each agent name has a small menu icon to its left.

Setting up a round robin is fast and easy because you can bulk add agents.

The screenshot shows the 'Bulk add agents' interface. At the top, it says 'Bulk add agents that are members of teams, departments or permission groups'. Below this is a search input field with a magnifying glass icon. To the right of the search field is an 'Add' button. Below the search field, a dropdown menu is open, showing a list of departments: 'Sales', 'Support' (highlighted with a blue bar and a mouse cursor), 'Partnerships', and 'Media Requests'. To the right of the dropdown menu is a 'Save' button.

You assign tickets to round robins using actions within the existing DeskPRO system of triggers, escalations and SLAs.

If you only want to assign *some* tickets to the round robin, or you want to have multiple different queues, it's all configurable using straightforward but incredibly flexible business logic.

Criteria ?

when

The following conditions are met:

Urgency<3

+ Criteria

or

The following conditions are met:

Department isMedia RequestsGeneral Contact

+ Criteria

Actions ?

then

The following actions will run:

Set Assigned Agent from Round RobinFront desk
