Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - [Commenti \(0\)](#) - [Product](#)

Under **Admin** > **Server** > **Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot displays the Admin Dashboard interface. On the left, a vertical sidebar menu lists various system components: Admin Dashboard, Setup, Agents, Tickets, CRM, User Interface, Chat, Apps, Tasks, Server, Server Settings, ElasticSearch, Report File, and Server Requirements. The 'Server' category is expanded, and 'Server Settings' is selected. The main content area is titled 'Server Settings' and contains two sub-sections: 'Cookie Settings' and 'Content Security Policy (CSP)'. Under 'Cookie Settings', there are input fields for 'Cookie Path' (containing '/') and 'Cookie Domain'. Under 'Content Security Policy (CSP)', there is a checkbox labeled 'Disable CSP headers' which is currently unchecked.
