

## How do I customize the text that appears on my Help Center?

Cecilia Sam - 2023-08-17 - Comments (0) - Configuration

Can I change the text used on the Help Center outside of the Publish app content?

Yes, you can change almost all of the user-facing text on the Help Center and in emails using the Deskpro phrases system.

To do this, go to **Admin > Configuration > Phrase Translation**. To the phrase you want to change, you can use the **Search box** on the page or **Ctrl-F / Cmd-F** keyboard shortcuts to search for the phrase on each page.

The screenshot shows the 'Phrase Translation' configuration page in Deskpro. The page has a sidebar on the left with navigation options like Overview, Configuration, Branding, Languages & Locales, Phrase Translation, Business Hours, Channels, Agents, Help Center, Ticket Structure, Features, Business Rules, CRM, Apps & Integrations, and Data. The main content area is titled 'Phrase Translation' and includes a search box, a filter dropdown, and a table of phrases. A red arrow points to the search box. The table has columns for 'Phrase', 'English', and 'Customized?'. The table lists various phrases under the heading 'Ticket Queues and Sets (27)', including 'obj\_ticketfilter.10\_title' through 'obj\_ticketfilter.20\_title'. The 'Customized?' column has checkmarks for all listed phrases. At the bottom of the table, it says 'Rows per page: 100 - 1-100 - of 343 (332 Unique Items)'.

In the **Text box**, enter your changed version of the text and click **Save**. If you have more than one language installed on the helpdesk, you will need to define the change for each language.

## Edit: obj\_ticketfilter.10\_title

obj\_ticketfilter.11\_title
