

## DeskPRO Build #272 Released

2013-07-02 - Chris Padfield - Comments (0) - Deskpro Releases

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #272.

The following is an automatically generated list of changes in this release:

- FIX Ticket merge menu listing currently ticket as an option
- FIX Notifications causing h-scroll when sub-line is too long
- FIX Merging agent accounts from agent interface could remove agent status on the account
- FIX Missing 'None' options under grouping by Product and Category
- FIX "Sending" overlay in replybox did not cover some buttons
- FIX Weird phantom option added to labels list (and some other multi-select select2's)
- FIX Tab icon on newticket when moved to tab
- FIX Agent-only chat fields showing in user interface
- FIX Entries into log\_items could potentially cause errors if long logs went over max packet size
- FIX Losing website url in widget during redirects

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
