New Chat Widget colors available

2017-05-30 - Zara Marchesi - [Comments \(0\)](#) - [Product](#)

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' section is visible, including 'Label' (set to 'Click for help'), 'Size' (set to 'Medium'), and 'Colors'. The 'Colors' section is expanded to show a color picker for the 'Background color', with the hex code #e60300 selected. A red arrow points from the color picker to the chat widget's background in the preview. The preview shows a chat widget on a website with a 'Sign in' button, a chat history, and a 'Click for help' button. The interface also includes 'Discard changes', 'Save', and 'Reset to default' buttons at the bottom.
