You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

### How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' section is expanded, showing options for Label, Size, and Colors. The 'Colors' section is highlighted, showing a color picker for the 'Background color' set to #e60300. A preview window on the right shows the chat widget on a Google search page, with a red arrow pointing from the color picker to the chat widget's background.
