

Improved Ticket List

2014-03-05 - Christopher Nadeau - Comments (2) - Product

In DeskPRO #317, a lot of work has gone in to making the ticket list faster and smoother.

The screenshot displays the Deskpro ticket management interface. On the left is a sidebar with navigation links and counts: 'My Tickets' (13), 'Support' (3), 'Sales' (10), 'Tickets I Follow' (5), 'My Team's Tickets' (0), 'Unassigned Tickets' (82), 'All Tickets' (110), and a breakdown of 'All Tickets' by status: 'None' (66), 'Support' (34), and 'Sales' (10). Below this is a table with columns 'TICKETS', 'LABELS', and 'FLAGGED', showing counts for 'Awaiting Agent' (110), 'Awaiting User' (150), 'Resolved' (77), 'Awaiting Validation' (0), 'Spam' (0), and 'Recycle Bin' (~1).

The main area shows a list of 13 tickets. At the top, there's a search bar and filters for 'Ordered by' (Urgency DESC) and 'grouped by' (Category). Below the filters, there's a selection bar showing '0 selected' and a list of filters: 'All 13', 'CatA 6', and 'None 7'. The ticket list includes columns for checkboxes, ticket numbers, subjects, email addresses, departments, categories, labels, and dates created. Each ticket entry also shows an 'Awaiting Agent' status with a count of 1 and a user icon.

Visible tickets include:

- #291: dignissim dictum in, orci libero <et1389873291.6221@example.com>, Department: Sales, Category: CatA, Date Created: 4 months ago
- #459: adipiscing ligula risus, nulla laoreet <tincidunt1389873291.5987@example.com>, Department: Sales, Category: CatA, Date Created: 2 months ago
- #472: in molestie id, viverra adipiscing <condimentum1389873291.8949@example.com>, Department: Sales, Category: CatA, Labels: at vitae viverra, Date Created: 2 months ago
- #540: lectus Aenean, interdum consectetur <et1389873293.1999@example.com>, Department: Sales, Category: CatA, Date Created: 3 months ago
- #669: nec mauris Curabitur, amet porttitor <facilisis1389873291.9816@example.com>, Department: Sales, Category: CatA, Labels: tempor, Date Created: 3 months ago
- #673: orci massa accumsan, orci amet <ullamcorper1389873292.245@example.com>, Department: Sales, Category: CatA, Date Created: 3 months ago
- #717: nunc in ut congue lacinia, lorem Nunc <orci1389873292.0473@example.com>, Department: Sales, Labels: convallis et feugiat, Date Created: 4 months ago

At the bottom, it says 'Showing 1 to 13 of 13' with navigation arrows.

Faster real-time updating

The list now responds to changes faster and more accurately. Tickets are added and removed from filter results in near real-time. No more distracting loading screens.

Correct sort order

As new tickets are added or updated in real-time, their position within the list is kept accurate. For example, if you are sorting by urgency and the ticket urgency changes, the position of the ticket in the list will change as well.

Pausing real-time updates

It is now possible to completely pause real-time updates by clicking the icon near the top right of the list. If a change happens while the list is paused, DeskPRO will show you a notice:

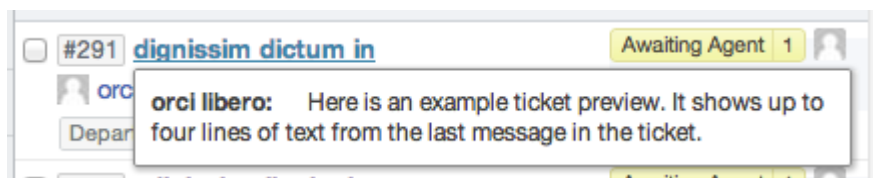

Real-time updates with mass actions

While working with mass actions, DeskPRO enters a “limited” real-time update mode. Ticket properties are kept up-to-date in the list and tickets are automatically removed, but no new tickets are added.

This means the list you are working on stays the same so long as you have mass actions open. It makes it easier to work with mass actions on busy helpdesks where other agents may be interacting with tickets at the same time as you are trying to perform mass actions.

Ticket Previews

Hover your mouse over a ticket subject link and a preview tooltip appears:

Good to see pictures and additional information regarding the update. Sometimes the release notes are less informative.

Very nice improvements. Now if only there were a first-page last-page capability. << < 3 > >> would be nice. << < 1 2 3 4 17 > >> would be even nicer.
