## New Feature: More Powerful JIRA Integration

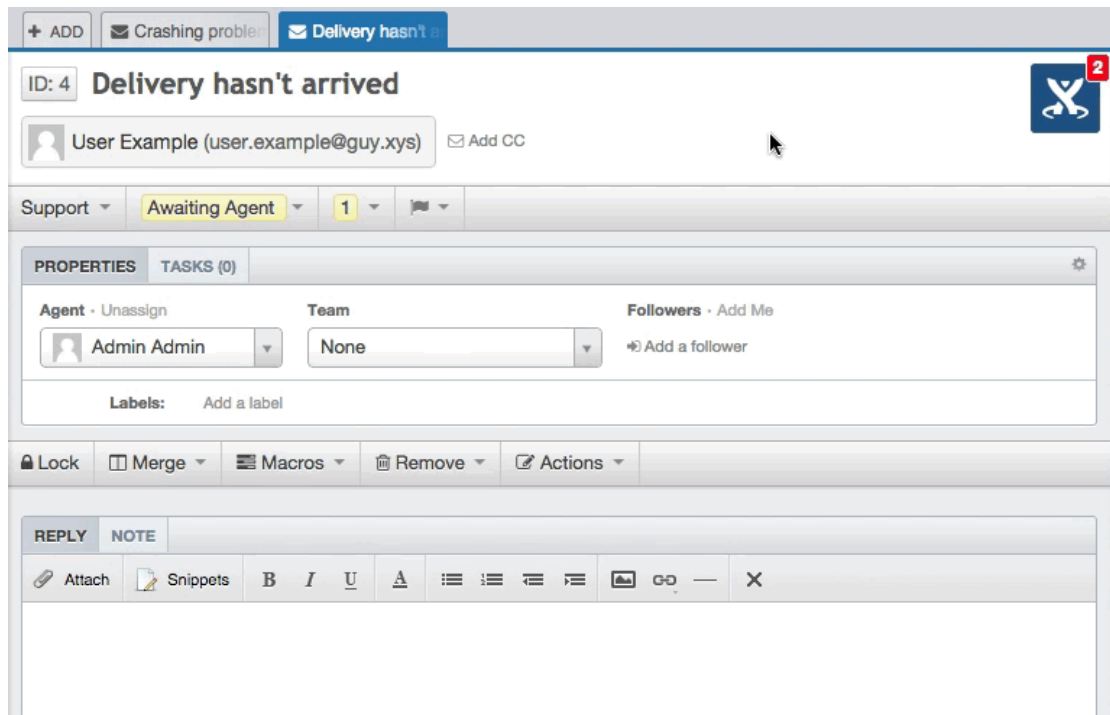

2014-12-08 - Ben Henley - [댓글 \(0\)](#) - [Product](#)

At DeskPRO, we know it's important that your helpdesk works with the rest of your software. That's why we offer a wide range of apps to integrate with third-party services.

[Atlassian JIRA](#) is a powerful issue tracking system. DeskPRO has had JIRA integration for a while, but now we've **completely overhauled our JIRA app** with more functions and a completely new interface style.

Now you have more options to link JIRA issues and DeskPRO tickets: link one ticket to multiple issues, or create a new issue based on a ticket.

JIRA information is displayed in a collapsible pane; you can open it only when you need it, or if you use JIRA integration a lot, keep it locked open all the time.

The updated app enables you to:

- View details of a linked issue, including JIRA comments, from within DeskPRO.
- See linked DeskPRO tickets from within JIRA.
- Post comments to JIRA from DeskPRO.
- Open a linked issue in the JIRA interface with one click.
- Customize which JIRA fields are displayed in DeskPRO.

Seems to happen with version 1.2 only.

JIRA Link [Administrator] added a comment - 1 minute ago  
Head of Support via DeskPRO #4: Confirmed by several users that upgrading to 1.3 fixes this.

You can also create DeskPRO triggers which respond to JIRA events:

**Criteria**

**when** The following conditions are met:

New Linked Issue  Project: Helpdesk

**and** Issue Status Any Linked Issue status is not Closed

+ Criteria

and add JIRA comments from your triggers, SLAs and escalations.

If you're currently using the old JIRA integration, don't worry: when you install the new app, all the links to JIRA that you've already created will continue to work.

See this Knowledgebase article for [more details about the JIRA app](#), including a full installation guide.
