

Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

Under **Admin > Server > Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot displays the Admin Dashboard on the left sidebar and the Server Settings page on the right. The sidebar menu includes: Admin Dashboard, Setup, Agents, Tickets, CRM, User Interface, Chat, Apps, Tasks, Server (expanded), Server Settings (selected), ElasticSearch, Report File, and Server Requirements. The main content area shows the 'Server Settings' page with the following sections:

- Server Settings**
- Cookie Settings**
 - Cookie Path: /
 - Cookie Domain: [Empty field]
- Content Security Policy (CSP)**
 - Disable CSP headers
