Community: attaching multiple files does not work as expected Report

- Jeroen van der Steen
- **Forumo pavadinimas:** #Bug Report

When creating a community report, such as this bug report, it is possible to attach files. Drag and drop allows dragging multiple files, and the Choose files dialog allows selecting multiple files at once. However, only one file is uploaded (or, at least, only one is shown as attached).

This also appears to apply to the new ticket form by the way.
