Image upload issues when creating articles/news Finished

- michael Offenbecher
- **Forumo pavadinimas:** #Bug Report

Just a few issues I notice when uploading an image while creating an article.

 1. Using IE 9 (9.0.8112) there is only a browse button. Once you browse to an image it does not upload it. In fact the link just sits in the field box. I uploaded a picture for you to see.

 2. Dragging images using IE 9 works only if you use a .png and does not work for a .jpg.

 3. Using Chrome to upload a picture shows us a "choose file" button but when you browse to the image it just lists the name of the image and does not actually upload it. I uploaded a screen shot fo this also.

 4. Dragging a file using Chrome works great no matter what file type it is.

 I hope this all made sense. Good Luck
