## My report has stopped working with an "Unknown column reference tickets.charges.comment" error (Old)

Ben Henley - 2019-04-01 - Comments (0) - Creating Reports (Old)

### Question:

My existing report about ticket time log & billing has recently stopped working with an error about "Unknown column reference tickets.charges.comment".

The following error occurred: Unknown column reference tickets.charges.comment

Run Report

Save & Run

Save To Clone

### Answer:

The variable to include a ticket report comment changed in [Deskpro #413](#) when it became possible to add custom fields to charges.

Update your report, replacing **tickets.charges.comment** with **tickets.custom\_data[1]**.

If that doesn't work, check the ID of the comment field under **Tickets > Time Log & Billing > Fields**.

Replace the 1 in `tickets.custom_data[1]` with the number shown next to Comment.
