DeskPRO Build #38 Released

2012-07-04 - Chris Padfield - Comments (0) - Deskpro Releases

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #38.

The following is an automatically generated list of changes in this release:

- Responsive page widths
- Fix not setting you to active when returning with remember me cookie
- Fix comparing changes being too sensitive because of UTF-8 chars being encoded as entities sometimes
- Make sure DOMDocument reads in HTML string as UTF-8, fixes weird ? characters
- Add new cut pattern for gmail

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
