Email & RSS feed for News Finished

- Anonymous
- **Foruma nosaukums:** #Feature Request

We would like to see a way for customers to subscribe to News & Updates?

 I did not see an RSS feed or email subscription option or a way for a customer to enable updates when news is posted. We are looking at using the News section to post product updates and maintenance notices and we want to provide our partners and enterprise customers a way to receive it.

 In addition to customers signing up, we believe we also need the option to enroll certain customers (partners, resellers, enterprise) to receive updates without their action request.
