DeskPRO Build #237 Released

2013-02-11 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #237.

The following is an automatically generated list of changes in this release:

- Default original subject to empty string
- Use Tracekit to try and report fuller JS error stack traces where possible
- Add tracekit for trying to get browser stack traces
- Log the set from name

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
