

New Chat Widget colors available

2017-05-30 - Zara Marchesi - Comments (0) - Product

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the Deskpro Admin interface for the 'Site Widget & Chat' settings. The 'Button settings' section is expanded, showing options for Label, Size, and Colors. A color picker is open for the 'Background color' of the 'Sample answer' button, showing a color selection tool and a hex code input field. A black arrow points from the 'Sample answer' button in the chat widget preview to the color picker. The chat widget preview shows a Google search bar, a 'Sample question', and a 'Sample answer' button.
