

New Chat Widget colors available

2017-05-30 - Zara Marchesi - Comments (0) - Product

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' panel is expanded, showing options for 'Label' (set to 'Click for help'), 'Size' (set to 'Medium'), and 'Colors'. The 'Colors' section includes a 'Background color' picker with a color wheel and a text input field containing the hex code '#e60300'. Below the color picker are options for 'Column' and 'Left' alignment, and 'Right' and 'Left' orientation. The 'Chat settings' and 'Proactive chat settings' sections are partially visible below. On the right, a preview window shows the chat widget on a website. The widget includes a 'Sign In' button, a search bar with 'Google UK' and 'I'm Feeling Lucky' buttons, and a chat history showing 'Sample question' and 'Sample answer'. A red 'Click for help' button is visible at the bottom right of the preview. A black arrow points from the '#e60300' color input field in the settings panel to the 'Click for help' button in the chat widget preview.
