

## We have increased the flexibility of the interface with resizable panels

2022-10-10 - Lara Proud - Comments (0) - Product (Agent)

We've developed several exciting UI improvements that enhance the flexibility of Deskpro's interface. We wanted to make even more aspects of the helpdesk adjustable to provide a dynamic and customizable helpdesk platform that can fit each agent's preferences.

Resizing different columns in the interface is simple just hover over the side of the panel, your cursor will become a resizer, and the line will show a blue hover state to indicate that you can adjust it.

Then drag and drop the column to the width you want. Plus, the panels have a set default minimum width, so can return to their original size easily.

### Simultaneously adjust the Properties Panel and User Profile

You can now change the size of the ticket message by adjusting the width of the Ticket Properties Panel and the User Profile at once. We have added the ability to resize these columns to give you choices over your workspace.

In the Tickets app, when you select either the Properties Panel or User Profile both columns will become active and can be adjusted to give you the desired working space on a ticket.

You can also adjust the width of the Properties Panel in other helpdesk apps, such as the Publish interface. You can change the panel's size to give you more space when working on different types of Help Center content.

## Resizing Global Apps

We have also added the ability to resize your global apps when locked onto the right-hand side of the interface. Whether or not other panels are in view, the global apps are resized independently of the other panels in the interface and each other.

When part of the interface gets resized, the settings are remembered, so when you next open the panel it will display at the same width as previously adjusted. You can see this below with the global search app:

The screenshot displays a customer service dashboard with three main panels. The left panel, titled 'Tickets', shows a list of ticket categories and counts: Queues (247), MY INBOX, Mine (9), 1m Following (2), My Teams (23), My Pending (1), My Labelled (2), Starred (3), INBOX, Unassigned (18), Pending (1), SLA Failed (0), Unassigned (8), Labelled (9), Open Problem (7), All Open (55), and VIP AWAITING AGENT (5). The middle panel, titled 'Change payment information', shows a conversation with Agatha. The message reads: 'Hi, I need to update my billing information because my card has expired. I can't find where to do this can you help me?'. The response from Agatha says: 'Thanks, Agatha'. Below this is a '221B Energy' logo and a link to a help article: '@James Moriarty can you send Agatha this guide about updating her billing information: https://221benergy.deskpro.com/en-US/guides/setting-up-your-account/add-your-billing-information'. The right panel, titled 'Notifications', shows a list of notifications including 'New (5)', 'Dismissed', and 'History'. The bottom panel, titled 'Search', shows a search bar and a list of tickets, including 'Sherlock Holmes - sherlock.holmes@rest.com' and 'Sherlock Holmes - sherlock.holmes@rest.com'.
