

Can Deskpro integrate with other software?

Ben Henley - 2019-03-27 - Comments (0) - Using Deskpro

Yes, you can install apps to integrate with a wide variety of other software.

Head to our [Apps & Integrations](#) section on our website for a full list of what is available.

The list includes:

- Google Analytics
- Gravatar
- Highrise
- HipChat
- Slack
- JIRA
- Trello
- Zapier
- MailChimp
- Magento
- Microsoft Translator
- Salesforce
- Twilio SMS
- Clickatell SMS

You can install authentication apps so users/agents can log in with credentials from:

- Magento
- Active Directory
- Your own database (MySQL, PostgreSQL, SQLite, MsSQL, Oracle, or any database that supports ODBC connections)
- SAML identity providers
- Web software using the easy-to-implement JSON Web Token standard
- eZ Publish
- Okta
- OneLogin
- Facebook
- Google+
- Joomla
- LDAP
- phpBB

- [Twitter](#)
- [vBulletin](#)
- [XenForo](#)

If you have your own developers, Deskpro has a [full REST API](#) for integration with other systems and a PHP SDK, as well as a widgets and apps framework. See the article [Getting started with Deskpro development](#) for more details.

We can also develop [custom integrations](#) for you at reasonable prices.
