

## Easily filter your Community Topics with Lists

2024-02-06 - Lara Proud - Comments (0) - Product (Agent)

Continuing with our updates on the way you manage and filter your information in the helpdesk, we are introducing the Lists feature to Community.

This enhancement will help broaden Community capabilities by enabling agents to create custom no-code lists of your Community Topics. Agents will be able to form lists with the simple 'is/is not' filtering capabilities already available for Tickets and in the CRM.

The screenshot displays the Deskpro Community Topics interface. At the top, there's a search bar with the filter 'community\_topic.id = 3'. Below this is a table of topics. The table has columns for ID, Title, Forum, Status, Votes, and a user icon. The 'Status' column shows various states like 'Active', 'Collecting Feedback', 'Closed', 'Done', 'Under Review', and 'In Development'. To the right of the table is a 'Filter' sidebar. The sidebar has a 'Filter' button and a 'Clear' button. It lists several filter categories: 'Date / Time' (Date Created, Date Updated, Date Published), 'Properties' (Title, Content, Author, Status), and a section for 'Is' and 'Is Not' filtering. The 'Is' section is currently selected, showing a search bar and two options: 'Active' (checked) and 'Closed' (unchecked). Below the filter sidebar, there's a 'Clear all selections' button. At the bottom of the table, there's a pagination bar showing 'Items per page: 100', '1-12 of 12', and navigation arrows.
