## Language sync

2019-01-09 - Emily Booth - Comments (0) - Product

Included in <u>Deskpro 2019.1</u> is the release of the latest update to <u>language</u> feature on Deskpro. This update will now allow your admins to easily and quickly update your installed language packs.

This is done very easily with only a couple of clicks by heading to Setup > Languages and 'Settings & Tools' at the bottom of this page. You will see our new addition at the bottom of the page with a simple drop-down box to select the language that you wish to update or simply update all installed languages, and then press the button 'Download latest language'.
