Allow agents to filter all the nested custom field options in the top-level select box Collecting Feedback

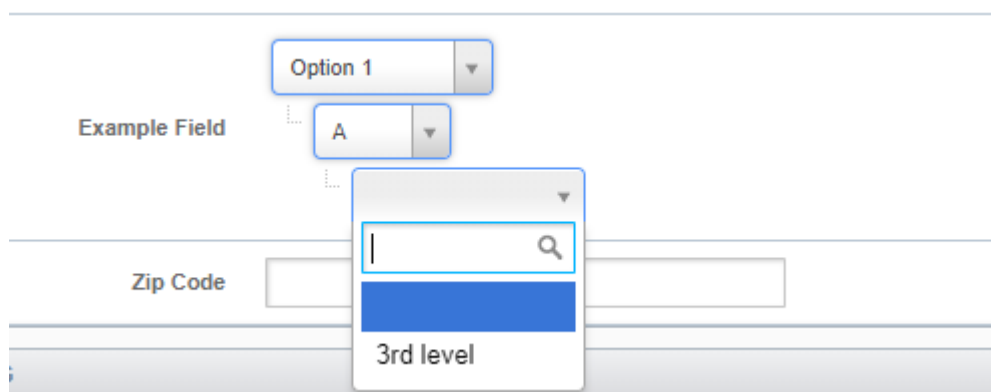

- TG Tyler Gelzaines
- **Naam forum:** #Feature Request

When we have a custom field option with one nested sub-option, both options appear in the same select box in the agent interface, so our agents can type to search for either selection:

The screenshot shows a form with a label 'Example Field' above a search bar. Below the search bar is a dropdown menu that is open, displaying two options: 'Option 1' and 'A'. The search bar has a magnifying glass icon on the right. Below the dropdown menu, there are labels for 'Zip Code' and 'Name'.

When we add a 3rd nesting level, the options are moved into their own select boxes and we aren't able to quickly filter the results in the top level box. We have to go through and manually select each option.

The screenshot shows a form with a label 'Example Field' above a search bar. Below the search bar is a dropdown menu that is open, displaying two options: 'Option 1' and 'A'. Below 'A' is another dropdown menu that is open, displaying one option: '3rd level'. The search bar has a magnifying glass icon on the right. Below the dropdown menus, there are labels for 'Zip Code' and 'Name'.
