## Handle re-sizing Guide content better for different screen sizes

### Finished

- DT Dave Topan
- **Naam forum:** #Feature Request

On the Portal, the width of the Guides doesn't adjust depending on the screen size. This means that text is still shortened and less legible, even though there is space to be used.

The screenshot shows a guide page titled 'Backup Policy'. The sidebar on the left contains a navigation menu with sections like 'APPLICATION AND ROLE R...', 'FILE RESTORE', 'POLICIES', and 'SYSTEM SPECIFIC RECOVE...'. The main content area displays the 'Backup Policy' page, which includes the title, a 'Published: 21/10/2019' and 'Updated: 21/10/2019' timestamp, and a table of contents on the right. The table of contents includes 'I. Purpose and Scope...' and 'II. Backup and Rec...'. A yellow box highlights the 'I. Purpose and Scope...' section in the table of contents.

Thanks for this suggestion, it has been implemented on Help Center. When you adjust the screen while looking at a Guide, the content will now adjust to fit the width of the browser to ensure it can still be read. The table of contents on the left-hand side will be stacked above the guide content and collapsed into a menu so it can still be accessed easily if you need to jump somewhere else in the guide.
