## Inserting pictures into a community comment Report

- Zsolt Kiss
- **Naam forum:** #Feature Request

Availability of inserting a picture into a comment would be extremely helpful. To explain something using a picture or diagram is much more easier and this option would make the communication more effective. Now this feature is completely missing from the system. Do you plan to develop the community part in the near future accordingly? Deskpro is amazing and yes it is a Swiss-Knife. But the Community part is weaker at several points comparing to the competitors.
