## How do I prevent a specific agent being assigned tickets?

Matthew Watt - 2023-08-10 - Reacties (0) - Admin

Ticket Assignment overrides Department Permissions, which means even if you have an agent that doesn't need to be assigned tickets, they could still accidentally be assigned tickets by other agents.

If you have a specific agent that doesn't need to be assigned tickets, you can create a **Ticket Update Trigger** to unassign tickets from them automatically. This is useful in the event another agent accidentally assigns them a ticket.

Simply, go to **Admin > Business Rules > Triggers > Ticket Update Triggers**, and click the **New** button at the top right.

	HELP CENTER		
00	TICKET STRUCTURE	Triggers automatically perform actions in response to ticket events. You can also define extra criteria the ticket must meet for the trigger to run.	
₽ 	FEATURES	Q Search Tilter Sort Sort View +	New
1.	BUSINESS RULES ^	0 selected 🗲 Action	
6	a Queues	New Ticket Triggers New Reply Triggers Ticket Update Triggers	
	Ticket Lists	C · Title &	ID
\$	Triggers	Apply: Per Department (11)	۵
	<ul> <li>SLAs</li> <li>Escalations</li> </ul>	Customer Support	
	S Round Robin	Customer Support - EU	
	苗 Agent Shifts		

Depending on how you want the action to run, you can either: 1) Create a Trigger that automatically assigns the ticket back to the agent who made the change, or 2) Create a Trigger that automatically moves the ticket back into unassigned.

## **Option 1:**

To automatically assign the ticket back to the agent who made the chang, create a trigger with the following settings:

	the following conditions are met:				
	Agent	<ul> <li>was changed to</li> </ul>	• Lara Proud ×	•	
Or	when the following conditions	are met:			
		▼ Select	·		
4 Actio	ns ns will apply when all of the crite	ria pass.			
Then	the following actions will run				

×

## **Option 2:**

To automatically move the ticket to unassigned, create a Trigger with the following settings:
