We're pleased to announce the release of Deskpro Horizon, version 2023.41. This release includes several enhancements to product functionality and bug fixes.

Latest Improvements

□ You can now quickly edit a Stat by hovering over it on the Navigation Panel in the Reports Interface.

This update lets you access and edit stats in your helpdesk more efficiently (SC 127244).

□ We added a check to verify the formatting of CSV headers before attempting to run an import to reduce the likelihood of duplicate headings causing a failed import (SC 117125).

Bug Fixes

□ The Mass Update Language tool will now let you set the user ticket language to nothing, or update from nothing to a language, where previously this action would fail (SC 98249).

□ We fixed an app integration issue where actions weren't performed when sending a reply or adding a note if using the "and close this ticket" or "and open next ticket" options (SC 104070).

□ Restored the Quick Stats on the Admin Dashboard, to ensure they display default data if the helpdesk stats are empty (SC 127671).

□ Ticket counts on the user's sub-search results will now account for Archived Tickets for CC'd Users which previously didn't display in the results (SC 123469).

□ Fixed an issue where toggling between the Knowledgebase Article editors would cause a URL replacement on non-standard URLs (SC 123024).

□ Creating a new Linked Ticket will now display in the Ticket History tab to provide a clearer history of actions on the ticket (SC 93623).

□ Fixed an issue where you couldn't scroll down on the Billing Page for On-Premise instances (SC 112758).

□ Restored the ability to call the API V2 Endpoint for News, Articles, and Files which previously resulted in an error (SC 128312).

- Fixed an issue impacting the migration of HTML in Snippets (SC 128403).
- Added some missing validation messages for Trigger actions (SC 124643).
