Articles edit issues V4 #build 259 Finished

- Sunny Liu
- **Forum Navn':** #Bug Report

The editor is broken. Lines get deleted, fonts, and format get changed when editing and saving articles! It is also corrupted my imported articles from V3.

 To replicate:

 1) Create a new article with 3 lines and format it BOLD or change size for example and save it .

 2) Open the article and save it again. (Format of the lines will change)

 3) Click Edit again and Line 1 will be missing. (Font gets smaller)

 4) Add another line with BIG font. Click save and it will change to small font.

This has been fixed for our next build (#260).
