Handle re-sizing Guide content better for different screen sizes Finished

- DT Dave Topan
- **Forum Navn':** #Feature Request

On the Portal, the width of the Guides doesn't adjust depending on the screen size. This means that text is still shortened and less legible, even though there is space to be used.

The screenshot shows a help center interface. On the left is a navigation sidebar with categories: 'IT Disaster Recovery', 'APPLICATION AND ROLE B...', 'FILE RESTORE', 'POLICIES', and 'SYSTEM SPECIFIC RECOVER...'. The 'POLICIES' section is expanded to show 'Backup Policy'. The main content area is titled 'Backup Policy' and includes a 'CONTENTS' table of contents on the right. The main text under 'I. Purpose and Scope' states: 'The purpose of this policy is as follows:' followed by three bullet points: 'To provide secure storage for data assets critical to the work flow of official KidsAbility business', 'To prevent loss of data in the case of accidental deletion / corruption of data, system failure, or disaster', and 'To permit timely restoration of archived data in the event of a disaster or system failure as outlined in the Disaster Recovery Plan'. Below this, it says 'This policy applies to all computers, laptops, tablets and desktops owned by'.

Thanks for this suggestion, it has been implemented on Help Center. When you adjust the screen while looking at a Guide, the content will now adjust to fit the width of the browser to ensure it can still be read. The table of contents on the left-hand side will be stacked above the guide content and collapsed into a menu so it can still be accessed easily if you need to jump somewhere else in the guide.
