Can I see the Deskpro source code?

Ben Henley - 2017-11-09 - Comments (0) - Using Deskpro

The full PHP source code for Deskpro is available to download [here](#).

A Deskpro On-Premise license gives you the right to modify and customise the source code of your installation. See section 3 of our [license agreement](#) for the details. You are not allowed to distribute the modified source code.

We'd love to hear about any fixes or improvements you make at support@deskpro.com.
