DeskPRO Build #229 Released

2013-01-29 - Chris Padfield - Kommentarer (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #229.

The following is an automatically generated list of changes in this release:

- Fix select2 width on search keywords list
- Fix simple (non-dom traversal) matches breaking when anchored
- Fix a couple thunderbird patterns missing anchors in regex causing them to over-match
- Fix a couple methods not marked as static

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
