Deskpro Horizon Release 2024.6

2024-02-06 - Lara Proud - [Kommentarer \(0\)](#) - [Deskpro Releases](#)

We're pleased to announce the release of Deskpro Horizon, version 2024.6. This release adds our Lists functionality to the Help Center and Community components of Deskpro for agents and admins, enhances the Facebook and WhatsApp Channels, along with numerous other improvements and bug fixes.

Check out the full changelog below for more details about the updates in the latest version of Deskpro.

New Features

[Use Lists in Community to more easily filter topics](#)

We wanted to improve management for agents, so we have added the Lists feature to Community (SC 132290).

The screenshot displays the Deskpro Community interface. At the top, there's a search bar with the text "community_topic.id = 3". Below this is a table of topics. The table has columns for ID, Title, Forum, Status, Votes, and a user icon. The status column shows various states like "Active", "Collecting Feedback", "Closed", "Done", "Under Review", and "In Development". To the right of the table is a filter sidebar. The sidebar has a "Filter" header and a "Clear" button. It contains sections for "Date / Time" (Date Created, Date Updated, Date Published) and "Properties" (Title, Content, Author, Status). There are also "Is" and "Is Not" buttons, a search bar, and checkboxes for "Active" and "Closed". At the bottom of the sidebar, there's a "Clear all selections" button. At the bottom of the table, there's a pagination bar showing "Items per page: 100" and "1-12 of 12".

Lists will allow agents to create custom no-code lists of topics. Admins can make global or team-specific lists for reuse time and time again when managing your Community content and engaging with your end-users.

[Respond to Facebook comments and posts privately](#)

Enhancements to Facebook ticketing allow agents to privately respond to users' public posts and comments on your Page (SC 103815).

To do this, choose Direct Message when responding to the comment or post.

□ Quickly and easily open website links listed on CRM Profiles

Hover over URLs saved on User and Organization Profiles and click the new option that re-directs you to the website associated with the CRM profile in a new tab (SC 132682).

Latest Improvements

- For WhatsApp Direct, Media Messages, such as images, gifs, and videos, will be displayed in WhatsApp Tickets (SC 121503).
- Macros will be listed alphabetically in the Macros app (SC 135436).
- We have updated the dropdown menu on the Forwarding tab (SC 135565)

Bug Fixes

- Fixed an issue where agents would be re-directed to the incorrect login page when logged into more than one brand (SC 135974).
- Community Topic Titles will be visible when viewing the Help Center on a mobile (SC 134242).
- Updated how the expand tooltip displays on the Help Center properties pane (SC 129519).
- Resolved an issue where Users added to the To field of an email were not being recognized as a CC (SC 138395).
- Sub-groups of Queues with 0 tickets will no longer be displayed (SC 134499).
- When grouping your ticket queue by status, custom translations for statuses will be visible (SC 137966).
- Fixed an issue with permission checks from an agent's usergroup not allowing them to take permissible actions (SC 140256).

- ☐ Fixed an issue where URLs to private files returned by the API and Help Center were missing an access token (SC 139980).
- ☐ Resolved an issue where ticket properties appear empty in the ticket preview when an agent has the properties panel collapsed (SC 127605).
- ☐ Resolved an issue where Trigger actions based on Approval events were not sending correctly (SC 121438).
- ☐ Restored the correct number of Users on CRM tables (SC 138890).
- ☐ To improve clarity, agents' initials will be visible instead of an avatar on the ticket queue in dual view if the agent does not have an avatar set (SC 130600).
- ☐ Fix an issue where edits to CRM custom fields would not save (SC 138129).
- ☐ Resolved an issue where an error would occur if an agent replying to a ticket had an image in their signature, and a macro running on send would cause a trigger to execute (SC 134050).
- ☐ Corrected an issue where the Call Webhook trigger would glitch when editing the text (SC 133571).
- ☐ Fixed an issue in ticket messages where text in a table could overflow the column (SC 137362).
- ☐ Resolved the issue where total billing charges were not accurate (SC 140734).
- ☐ Fixed a bug causing users to be unable to connect to TeamViewer sessions (SC 140719)

Patch Release 2024.6.1

We have released a patch release to resolve the following issues:

- ☐ Fixed an issue with the Trello and Jira apps returning an error for the options request (SC 142224).
- ☐ Resolved an issue where the forward out of helpdesk setting “use account on ticket” was not working correctly (SC 141984).
- ☐ Fixed the issue impacting the WhatsApp and Twilio SMS logs loading (SC 142067).
- ☐ Resolved an issue where the Facebook Proxy wasn’t parsing domains correctly which impacted requests being forwarded (SC 142107).

On-Premise Controller Release 2.14.0

We are also delighted to announce the latest version of the OPC 2.14.0. This version will enhance the level of administrator capabilities with improvements and bug fixes.

Latest Improvements

- ☐ Support proxying websockets in Nginx configuration (SC 140497).
- ☐ Add several more host-level commands to the diagnostic report (SC 141764).

Bug Fixes

- ☐ Ensure relevant add-ons run on deskpro_net docker network (SC 141671).
- ☐ Ensure the correct database name is used for external database parameters when validation errors occur (SC 141668).
