

New Feature: Round Robins

2014-08-11 - Ben Henley - [Kommentarer \(0\)](#) - [Product](#)

When you're managing a busy helpdesk, sharing out the workload evenly can be vital.

We've added support for 'round robin' assignment to DeskPRO's powerful automation system. Here's how it works: you define a queue of agents, and as tickets come in, each one is assigned to the next agent in the queue, until the end is reached and the round robin begins again with the first agent.

Because you're assigning to individual agents, it's always clear who's responsible for each ticket; and because it's automatic, there's no time spent deciding who'll handle which issue.

The screenshot shows a form for creating a queue. The 'Title' field is labeled 'Support triage'. Below it, a note states: 'This is the title as it will appear throughout the agent and user interfaces.' The 'Agents' section is titled 'Agents *' and contains a list of agents with checkboxes. The agents are: Gideon Beard (checked, with a 'Next in queue' badge), Lucy Hamlet (checked), Hisco Romnus (checked), Nadim Singh (checked), Chris Max (checked), Lesley Burrow (checked), and Sue Kalam (unchecked).

Setting up a round robin is fast and easy because you can bulk add agents.

The screenshot shows the 'Bulk add agents that are members of teams, departments or permission groups' section. A dropdown menu is open, showing a search bar and a list of departments: Sales, Support (highlighted with a mouse cursor), Partnerships, and Media Requests. There are 'Add' and 'Save' buttons to the right of the dropdown.

You assign tickets to round robins using actions within the existing DeskPRO system of triggers, escalations and SLAs.

If you only want to assign *some* tickets to the round robin, or you want to have multiple different queues, it's all configurable using straightforward but incredibly flexible business logic.
