Can we set the multilevel department in Deskpro?
For Example:
Level 1: Application
Level 2: Application1, Application2, etc
Level 3: Application1-User, Application1-Modul1, Application1-Modul2, Application1-Modul3, etc
Level 4: Applicattion1-User- Register User, Application1-User-Reset Password, etc

I have tried it but I just only set into level 2.
