The new quick reply looks very helpful, but I have noticed it does not work in the compact list view. Can that be added as well?

Do you mean 2 column v 1 column view? It's working for me. Not quite sure where you mean?

2-column, but compact list. Sent reply to your email with screen shot. Don't see a way to attach file from feedback page.

It's what we call 'table view' in the list pane that doesn't show the quick actions.
