

DeskPRO Build #174 Released

2012-11-08 - Chris Padfield - Komentarze (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #174.

The following is an automatically generated list of changes in this release:

- Fix disabling all portal tabs breaking editor
- Add support for showing a Twitter feed in the portal sidebar. (Requires configuration of the block to enable.)
- Fix labels not saving if you close the tab within two seconds of making changes
- Add request token to a few plain links in the agent interface

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
