## Deskpro Private Controller Release 2.27

2026-04-15 - Chris Robinson - [Komentarze \(0\)](#) - [DPC Releases](#)

This release upgrades the search functionality in the Deskpro Private Controller for better performance and reliability, alongside general stability improvements and a minor fix to settings updates.

### 2.27.0

#### New Features

- Upgrade search service for new installations of the DPC.

#### Bug Fixes

- Correct the CLI output when enabling and/or disabling telemetry.
