Organization Criteria in Filters Should Present List of Organizations Finished

- Kris van der Starren
- **Forum name:** #Feature Request

The "Organization Name" criteria doesn't currently present a list of organizations in DeskPRO. When you begin to type something, it should offer you a list of the organizations in your system. See attached screenshot.

 Since it doesn't offer a list, I assume this also means that it's not actually linked to the organizations in the system. If this is the case, that's likely means that renaming an organization will also break the filter, which is bad.
