

<u>Centro de Suporte > Comunidade > Feature Request > Problem and Incident Enhancement</u> Problem and Incident Enhancement Collecting Feedback

- Ben Willis
- Nome do fórum: #Feature Request

Please consider expanding the Problem and Incident functionality to allow tickets/incidents that are associated with a Problem to be updated (with a single response) in mass when the parent problem has been closed by either a workaround or by resolving the root cause .

This would put DeskPro and this feature more in line with ITIL best practices.
