

## Does Deskpro support multiple languages?

Ben Henley - 2022-09-12 - Comment (1) - Using Deskpro

Deskpro has support for 29 languages (at the time of writing) and we are working to add more.

Supported languages include:

- العربية (Arabic)
- 英语 (美国) (Chinese (Simplified))
- Čeština (Czech)
- Dansk (Danish)
- Nederlands (Dutch)
- Suomen Kieli (Finnish)
- Français (French)
- Deutsch (German)
- Ελληνικά (Greek)
- Magyar (Hungarian)
- Bahasa Indonesia (Indonesian)
- Italiano (Italian)
- 本語 (Japanese)
- 영어 (Korean)
- Norsk (Norwegian)
- فارسی (Persian)
- Polski (Polish)
- Português (Portuguese)
- Română (Romanian)
- Русский (Russian)
- Español (Spanish)
- Slovenian (Slovenian)
- Slovenčina (Slovak)
- Svenska (Swedish)
- Türkçe (Turkish)
- English (UK)
- English (US)
- Tiếng Việt (Vietnamese)
- Cymraeg (Welsh)

To see the currently available languages, go to **Admin > Setup > Languages**. If the language you want is not yet available, or you wish to help translate any of the language packs further, for the Help Center you can use our [crowdsourced translation system](#) to help us add it.

Next to each language, you can see which interfaces are supported. "User" means that the user-facing text (the portal and emails to users) will be translated. "Agent" means the Agent interface and emails to Agents will be translated.

 English (English)	admin agent user
 Nederlands (Dutch)	user
 Français (French)	agent user

To use a language, you must first install it. See Installing new languages in the Admin manual for details.

Users will then be able to select their preferred language on your portal:

We should be able to set a preferred language for an organisation, set a preferred language for a user, And then the language could be inherited from organisation to user to tickets. In that way mail templates can follow the languages.
