Reports on Tickets excluding the time ticket was on Resolved Status Collecting Feedback

- Valentina Georgieva
- **Nome do Fórum:** #Feature Request

I want to have a report for the average/total time a ticket has been waiting for an agent, which excludes the time the ticket was on status "Resolved".

Currently, DeskPro only keeps the last time/date when the ticket was set to "Resolved".

Therefore, if a ticket has been re-opened afterwards, the reports are not showing the correct details (since they include the time the ticket was on resolved status).
