How can I show text on the Help Center only to a certain usergroup?
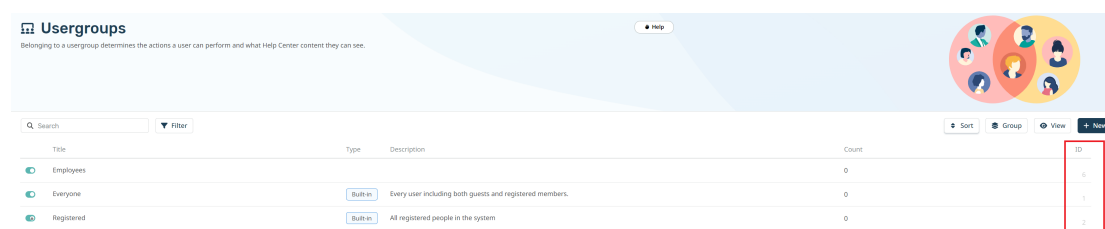

Hannah Scott - 2023-09-13 - Comentários (0) - Help Center

Question:

How do I edit a portal template to show some text only to users who belong to a particular Usergroup?

Answer:

First, find the ID number of the Usergroup you wish to show the text to in **Admin > CRM > Usergroups**

Now add this to the Help Center template where you want the message to appear:

{% if app.user.isMemberOfUsergroup(N) %}

Text to display

{% endif %}

replacing N with the ID of the usergroup, and putting the message you want in place of "Text to display".

See the admin guide for Editing Help Center Templates.
