Extension of Authentication Options (5.2)

2017-03-13 - Lauren Cumming - [Comentários \(0\)](#) - [Product](#)

We have extended the authentication options available so that you can now:

- add agents/users to multiple usergroups
- add agents to teams
- add labels to agents
- add labels from value
- make an agent an admin

You can also now add multiple actions at a time and add filters e.g Add to agent permission group 'only if X'.

The screenshot shows the 'Login Actions' configuration page. On the left, the text 'Login Actions' is displayed. To the right, there is a section titled 'Add Action' in blue. Below this title, there are five rows, each containing a dropdown menu with the text 'Add to agent permission group', a text input field, and a checkbox labeled 'only if x'. The first row's dropdown menu is open, showing a list of options: 'Add to agent permission group' (which is highlighted with a blue bar and a checkmark), 'Add to agent team', 'Add to usergroup', 'Add label', 'Add label from value', and 'Make agent an admin'. At the bottom of the interface, there is a navigation bar with a back arrow, a 'Cancel' button, and a green 'Save App' button.
