Introducing Deskpro Guides

2017-10-23 - Benedict Sycamore - [Comentários \(0\)](#) - [Product](#)

We're delighted to announce the beta release of our brand new product feature, Deskpro Guides.

What is Deskpro Guides?

Deskpro Guides is a feature that allows you to create your own indexed library of instructive user manuals, built right into the Deskpro user portal.

The screenshot displays the Deskpro user portal interface. At the top, there is a navigation bar with the Deskpro logo, a user profile for 'James' with a 'Logout' button, and a language selector set to 'English'. Below this is a search bar with a 'SEARCH' button and a 'CONTACT US' button. A secondary navigation bar contains links for 'Knowledgebase', 'Guides', 'News', 'Feedback', 'Downloads', and 'Contact Us'. The main content area is titled 'Thanksgiving' and features a sidebar with a tree view of categories: 'PREPARING DINNER' (Gravy, Nick's Guide), 'MASHED POTATOES' (Sweet Potato Pie, Corn On The Cob, Green Beans, Roast Turkey, Entertaining Chil...), and 'Avoiding Mother-In-Law'. The 'Roast Turkey' article is selected, showing its title, publication and update dates, and a brief introduction. The 'Method' section contains a 7-step numbered list of instructions for preparing the turkey. At the bottom, a recommendation suggests making 'Gravy' for the turkey.

It allows you to provide users with convenient and highly-useful information about your product and services from your Deskpro user portal. This means the volume

of incoming tickets are reduced, and customer satisfaction increases due to the depth of self-service options.

When your customers receive self-service support, agents are able to focus on resolving more complex and tricky customer issues. Guides is one of the easiest and cheapest ways to keep customers serviced and informed. It's the optimal tool in handling high-volume, simple queries regarding your products and services.

It's available 24/7, and turns your ordinary users into fully-engaged power users.

How does Guides differ from Knowledgebase?

Knowledgebase is a catalogue of support-related articles on anything from troubleshooting to FAQs - and any other nitty gritty questions your customers want answered. It's designed to be populated by multiple contributors, frequently added to, and navigated using search terms.

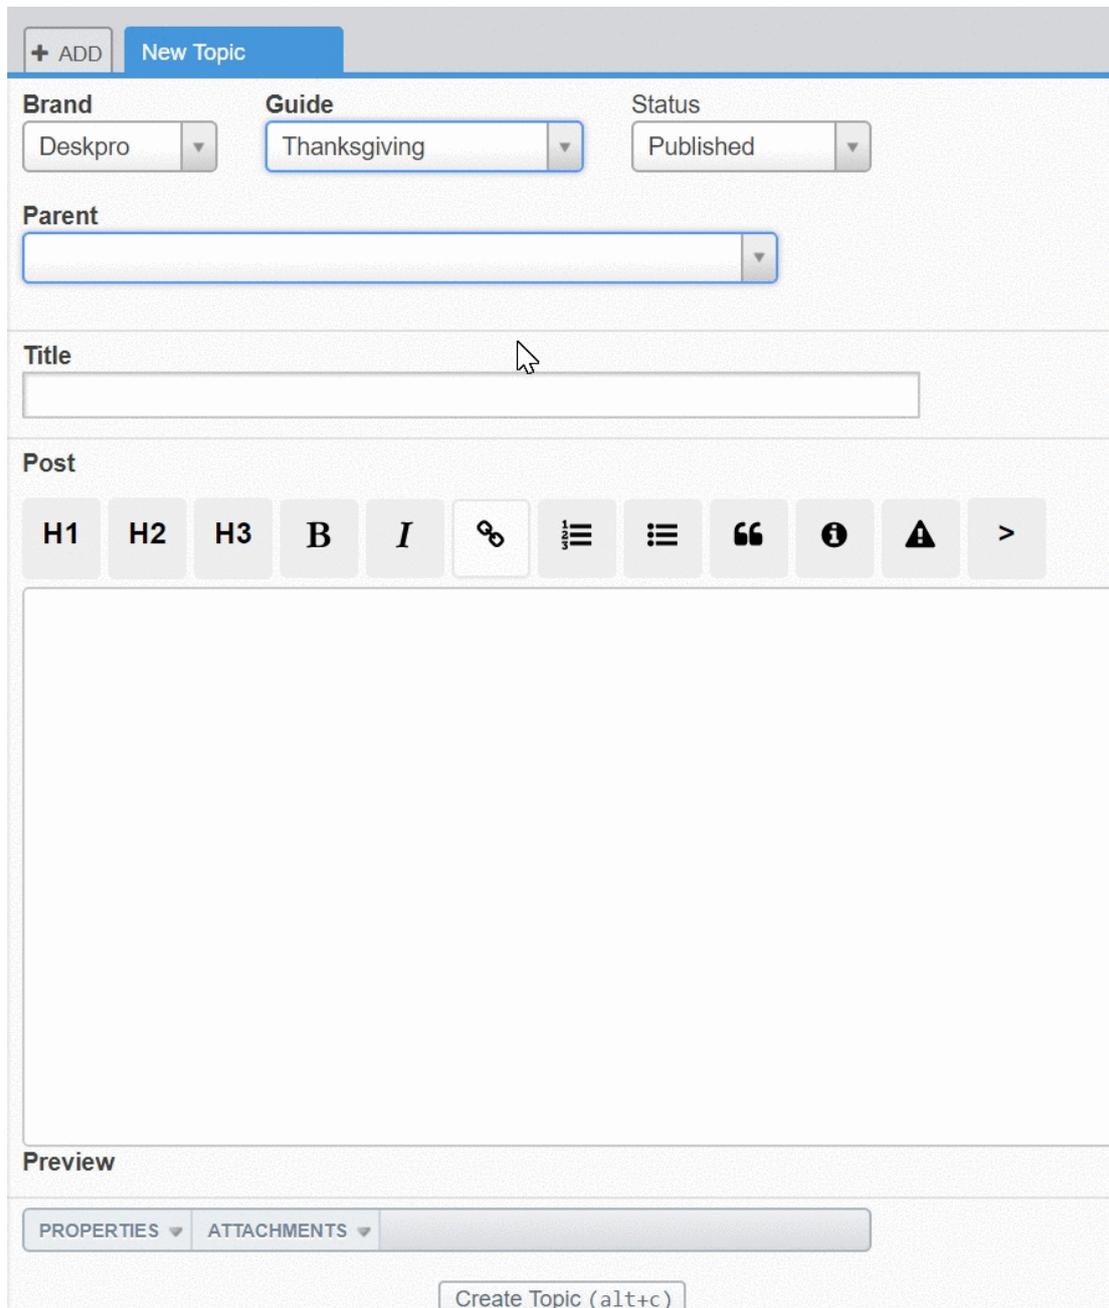

On the other hand, Guides is a clearly indexed library of instructive user manuals that provides users with prescriptive information on how to use your product or services. It's designed to host more formalized and highly-authored content, which can be changed over time, and is navigated using indices.

The screenshot displays the 'GUIDES' interface for 'THANKSGIVING'. On the left, a navigation tree lists various topics: Preparing Dinner, Gravy, Nick's Guide, Mashed Potatoes, Sweet Potato Pie, Corn On The Cob, Green Beans, Roast Turkey, Entertaining Children, Family Management, and Avoiding Mother-In-Law. The 'Roast Turkey' article is selected and displayed on the right. The article includes a title, a status of 'Published', and a 'Thanksgiving' category. Below the title is a rich text editor with a 'Save' button. The main content area contains a 'Method' section with a numbered list of steps: 1. Up to four days before, make the brine by combining the salt, peppercorns, bay, sage and sugar using a pestle and mortar, or crush with the end of a rolling pin in a bowl. Stir through both zests and spoon roughly 1/3 into a large resealable bag and the rest in another bag to chill. 2. Put the turkey legs and wings in the bag with 1/3 of the brine and shake well to coat the skin, then leave overnight in the fridge. 3. The next day, heat oven to 120C/ 180C fan/gas 1. Rinse the brine from the legs and wings and pat dry. Put the duck fat in a roasting tin, melt in the oven for 5 mins, then add the turkey pieces (they should be submerged in the fat). Cook in the middle of the oven for about 4 hrs or until the legs are tender. Leave to cool, then cover and chill overnight, or up to three days. 4. On Christmas Eve, cover the turkey crown in the remaining dry brine and chill in the fridge overnight. A 'Preview' section shows a smaller version of the article content. A 'Method' section is also visible, containing the same numbered list of steps. The interface includes a search bar, a 'Save' button, and a 'Showing results 1 - 11 of 11' indicator at the bottom left.

Essentially, users look to Knowledgebase for answers to specific questions, and Guides for comprehensive information on particular categories.

How do I use Deskpro Guides?

Guides can be managed by Deskpro from the Publish section of the helpdesk agent interface. Here you can add new guides documents, or edit existing ones.

The screenshot shows the 'New Topic' form in Deskpro. At the top, there is a '+ ADD' button and a 'New Topic' tab. Below this, there are three dropdown menus: 'Brand' (set to 'Deskpro'), 'Guide' (set to 'Thanksgiving'), and 'Status' (set to 'Published'). A 'Parent' dropdown menu is empty. Below these is a 'Title' text input field. The 'Post' section features a rich text editor toolbar with buttons for H1, H2, H3, Bold (B), Italic (I), Link, List, Unlist, Quote, Info, Warning, and a right arrow. Below the toolbar is a large text area for the guide content. At the bottom, there is a 'Preview' section with 'PROPERTIES' and 'ATTACHMENTS' dropdowns, and a 'Create Topic (alt+c)' button.

Authoring and editing of guide content is done using a rich and easy-to-use markdown publishing tool. Markdown formatting means there is visual consistency across all guides, and requires no code to use effectively.

As well as creating and editing content, you can also organize and arrange how guides appear to users. Within each guide, It's possible to create nested topics in which content subtopics appear, allowing for easier user navigation.

The permissions of individual guides can be edited from the agent interface, allowing you to select whether guides are visible to everyone, registered users, VIPs, specific user groups, or your own agents.

Once guides are published, they appear in the new 'Guides' section of the user portal, right next to Knowledgebase.

Visitors to your user portal will then be able to effortlessly browse and read guides you have published; given they meet the correct permission criteria.

For more information on using Deskpro Guides, keep an eye on the Guides section of the Deskpro user portal. We'll be uploading comprehensive manuals on using Deskpro Guides soon.

One more important thought...

If you are using Deskpro Cloud, we will roll out this update to your Helpdesk soon.

If you are using Deskpro On-Premise, you can update your Helpdesk to the latest version from your Admin Interface.

We'd like to thank our customers for using Deskpro like support superheroes, and helping us improve the software we take great pride in developing.

We look forward to receiving your feedback about Deskpro Guides, and wish you all the best in the meantime.
