Question:

I want to increase the number of news posts shown on the section of the portal home page highlighted below. How do I show the most recent five articles here?

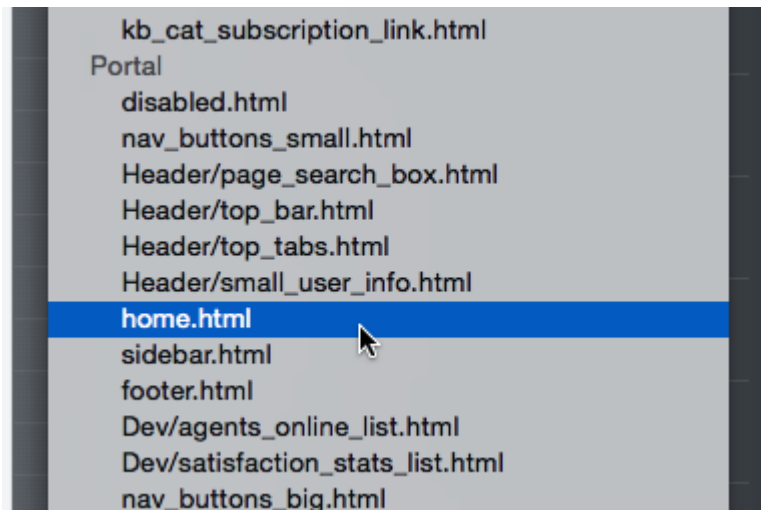

Answer:

You can do this by editing the portal templates.

1. Go to the portal editor at **Admin > User Interface > Portal**.
2. Click the **Template Editor** section at the lower left.

3. In the Portal section, select the **home.html** template.

6. The template editor opens. Find the line that says:

```
{% show section news_list_excerpts with { count: 2,
show_category_link: true } %}
```

Edit the number in **count: 2** to the desired number of articles: in this case, 5.

7. Click the X at the top right of the template editor to close it.

8. Click the green **Preview Changes** button at the top of the screen to see the effect of the edit and verify that the section now shows five articles instead of two.

9. Click the green **Save Changes** button at the top of the screen to save your edit and apply it to your live portal.
