

New Feature: More Powerful JIRA Integration

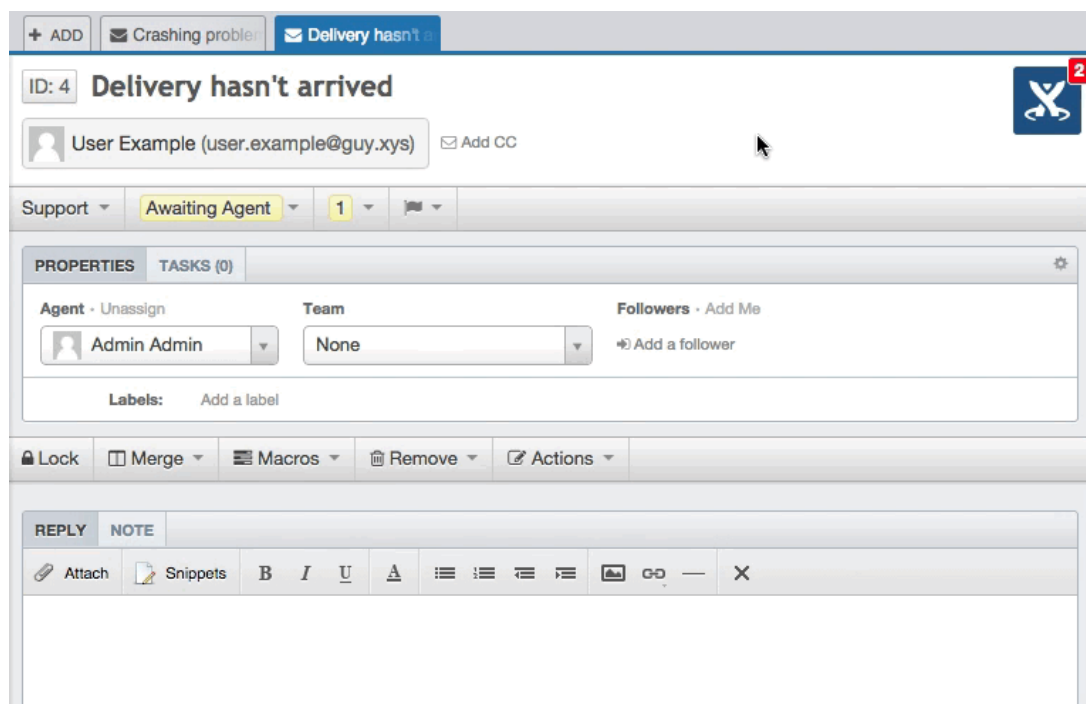

2014-12-08 - Ben Henley - Comments (0) - Product

At DeskPRO, we know it's important that your helpdesk works with the rest of your software. That's why we offer a wide range of apps to integrate with third-party services.

[Atlassian JIRA](#) is a powerful issue tracking system. DeskPRO has had JIRA integration for a while, but now we've **completely overhauled our JIRA app** with more functions and a completely new interface style.

Now you have more options to link JIRA issues and DeskPRO tickets: link one ticket to multiple issues, or create a new issue based on a ticket.

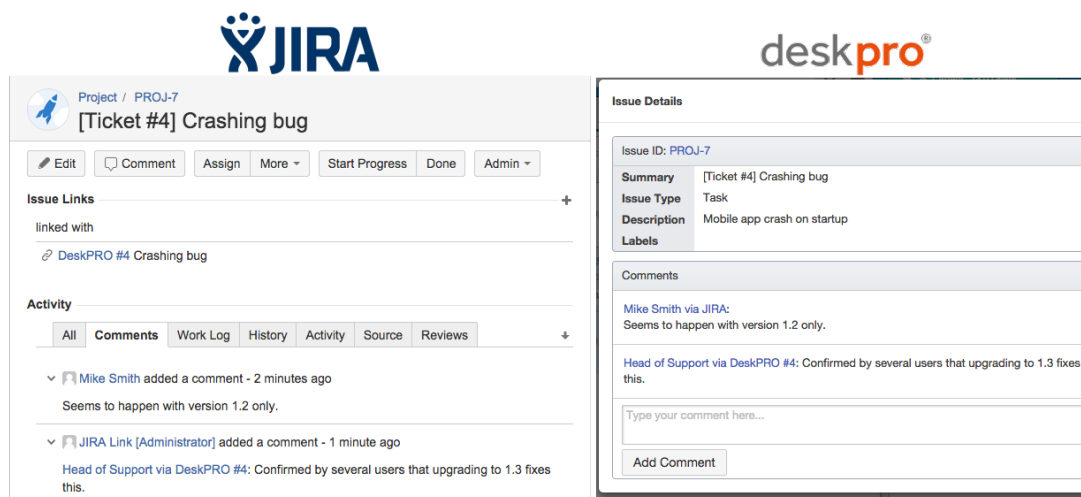

JIRA information is displayed in a collapsible pane; you can open it only when you need it, or if you use JIRA integration a lot, keep it locked open all the time.

The updated app enables you to:

- View details of a linked issue, including JIRA comments, from within DeskPRO.
- See linked DeskPRO tickets from within JIRA.

- Post comments to JIRA from DeskPRO.
- Open a linked issue in the JIRA interface with one click.
- Customize which JIRA fields are displayed in DeskPRO.

You can also create DeskPRO triggers which respond to JIRA events:

The image shows a "Criteria" configuration window in DeskPRO. It has a "when" tab and a header "The following conditions are met:". Below this, there are two conditions: "New Linked Issue" with a checked "Project:" dropdown set to "Helpdesk", and "Issue Status" with a dropdown set to "Any", "Linked Issue status" set to "is not", and a dropdown set to "Closed". At the bottom, there is a green button labeled "+ Criteria".

and add JIRA comments from your triggers, SLAs and escalations.

If you're currently using the old JIRA integration, don't worry: when you install the new app, all the links to JIRA that you've already created will continue to work.

See this Knowledgebase article for [more details about the JIRA app](#), including a full installation guide.
