Percentage of tasks completed within their due date by agent Report

- Matthew Wray
- **Forum name:** #DPQL Reports

We can run the report below to find the percentage of tasks that we are completing before their due date:

```
SELECT DPQL_ALIAS(DPQL_PERCENT(UNIX_TIMESTAMP(tasks.date_completed) <
UNIX_TIMESTAMP(tasks.date_due)), 'Percentage of tasks completed in
time')
FROM tasks
WHERE tasks.is_completed = 1
GROUP BY tasks.person.name
```

Here we use the UNIX_TIMESTAMP* which allows us to apply a numerical value to a date-time.

The number simply counts up so the further into the future the higher the number.

In this instance we're simply finding whether tasks.date_completed is less than tasks.date_due.

We're then formatting this using [DPQL_PERCENT](#).

* You can read more about UNIX Timestamp below:
