

How do I assign out-of-hour tickets to a particular team?

Ben Henley - 2024-01-09 - Comment (1) - Deskpro Legacy

Suppose you want to treat incoming tickets differently if they are created outside of working hours. In this example, we'll show how to assign them to a night shift team.

This is easy to accomplish with triggers:

The screenshot shows the configuration for a trigger in Deskpro. It is divided into three main sections: Title, Event, and Actions.

- Title:** A text input field contains "New out-of-hours tickets to night shift". Below it, a note states: "This title will be used throughout the admin interface to refer to this trigger."
- Event:** The event is "When a new ticket is created". It has two columns of checkboxes:
 - Left column: By a user, via the web, via email, via the API.
 - Right column: By an agent, via the agent interface, via email, via the API.
- Criteria:** A section titled "Criteria" with a plus icon. It contains two rows:
 - Row 1: A blue header "when" followed by "The following conditions are met:". Below it is a dropdown menu set to "Is outside of working hours". Underneath are two radio buttons: "Default working hours" (selected) and "Set custom working hours". A green button with a plus icon and the text "Criteria" is at the bottom of this row.
 - Row 2: A blue header "or" followed by "The following conditions are met:". Below it is a green button with a plus icon and the text "Criteria".
- Actions:** A section titled "Actions" with a plus icon. It contains one row:
 - Row 1: A purple header "then" followed by "The followings actions will run:". Below it is a dropdown menu set to "Set Assigned Team" and another dropdown menu set to "Night Shift". A green button with a plus icon and the text "Action" is at the bottom of this row.

Note that the "working hours" used will be those **Default Working Hours** in **Tickets > Settings** - but you could choose to specify custom hours just for this trigger.

You'd probably also want the same team to receive *replies* to tickets from users, not just new tickets:

Title *
This title will be used throughout the admin interface to refer to this trigger.

Event When a new reply is submitted
 By a user By an agent
– via the web ⚙️
– via email
– via the API

Criteria ?

when The following conditions are met:

▾
 Default working hours Set custom working hours

or The following conditions are met:

Actions ?

then The followings actions will run:

Set Assigned Team
